Professional Summary

Computer and Information Engineer focused on backend development using Node.js and TypeScript.

I have built REST APIs, authentication systems, and deployed applications in Linux environments, applying layered architecture, error handling, and clean development practices.

I also bring over 10 years of experience working with critical industrial systems in the energy sector, contributing strong analytical thinking, problem-solving skills, and real-world operational insight.

Technical Skills

- **Backend** — Node.js, Express.js, REST APIs
- **Languages** — JavaScript (ES6+), TypeScript, Python (basic), Bash
- **Databases** — PostgreSQL, MongoDB, CouchDB
- **Dev Tools** — Git, GitHub, GitHub Actions, CI/CD, GitHub Pages
- **Systems** — Linux (Fedora, Ubuntu Server)
- **Concepts** — Layered architecture, authentication, API integration, automation

Projects

- **Jasjic – Shared Expense Management App**
 - Web application with backend built using Node.js and Express
 - Implements Google OAuth authentication and CouchDB data persistence
 - Deployed in a Linux production environment and used in a real-world scenario with continuous improvements.
- **Task Manager REST API**
 - Backend built with Node.js, Express, and TypeScript
 - Layered architecture and PostgreSQL persistence
- **CV Builder – Automation Tool**
 - Automated CV generation using Markdown, Pandoc, and LaTeX
 - Includes Bash scripting and CI/CD integration with GitHub Actions
- **API Explorer (SPA)**
 - Web application consuming public APIs
 - Dynamic data rendering and state handling in frontend

Professional Experience

- **Backend Development (Self-driven Projects)**
2025 – Present
Development of backend applications using Node.js, Express, and TypeScript. Building REST APIs, implementing authentication, and deploying applications in Linux environments.
- **Process Operator — ENAP Aconcagua Refinery**
2016 – 2025 | Concón, Chile
Operation and monitoring of critical industrial systems. Real-time incident resolution and coordination with technical teams in high-demand environments.
- **IT Support Technician (Freelance)**
2006 – Present
Hardware and software troubleshooting, operating system installation, and end-user support.
- **Process Control — UTFSM (CCTVal)**
2013 – 2014 | Valparaíso, Chile
Participation in research projects involving process control and quality assurance of technical components.
- **Electronics Technician — Sensar Ltda.**
2010 | Valparaíso, Chile
Maintenance of electronic security and prevention systems.

Education

- **Computer and Information Engineering** — Universidad Andrés Bello, 2022
- **Electrical and Electronics Technician** — DUOC UC, 2014

Languages

- Spanish — Native
- English — Professional working proficiency (TOEIC)
